## GC3 CAP ORIENTER

### Compact cap orienting solution for the beverage industry

The Zalkin GC3 type cap orienter is dedicated to beverage closures up to 40,000 cph

The GC3 cap orienter sorts and orientates closures in capping position: a rotating disc carries the caps in the flat position beneath a rail to the cap chute.

#### Maximum Speeds:

- 25,000 cph with cap diameters over 32 mm
- 40,000 cph with cap diameters under 32 mm

#### FEATURES AND BENEFITS

- Designed for round plastic beverage screw-on caps, 25 to 45 mm in diameter and 8 to 35 mm in height
- Caps have to be bigger in diameter than their height
- Single-format cap orienter
- Small footprint
- Light weight
- Competitive price
- Short delivery time
