FEATURES AND BENEFITS

- Designed to be floor-mounted or on a platform, for an easy access during production and maintenance.
- Equipped with an autonomous control system

Product integrity

- Gentle cap handling with less cap stirring
- Cap selection with electrically adjustable swing device
- Elimination of static electricity
- Pulsed air filtration in closed loop (less plastic particles rejected in the surrounding environment)

Continuous operation

- Cap recirculation in the storage bin, without jamming risk - no start/stop of the system

Energy-efficient

- No compressed air needed
