BOTTLING
& CAPPING

Z-HORIZONTAL BUFFER

High-Speed Oriented Cap Accumulation Solution for the Beverage industry

Adapted to tethered caps and non-attached closures, up to 120,000 caps/hour.

FEATURES AND BENEFITS

- Designed to be floor-mounted or on a platform, for an easy access during production and maintenance.
- Equipped with an autonomous control system

Gentle cap handling

- Limited cap friction and closure deformation
- Bulk accumulation of the caps and realignment without mechanical device
- Anti-jamming system via air jets

Optional air quality treatment for the equipment operating with pulsed air

- Filters to increase the particles filtration performance
- Dedusting system
- Filtration system for air quality treatment
